

Qmarkets is Hiring!

Position Title: Senior Engineer

About us:

Qmarkets, a leading Innovation & Idea Management Software Company serving the Global Enterprise Market, is looking for a new member to join our amazing global team and work on a product serving over a hundred thousand users worldwide.

About the position (Description & Responsibilities):

As Senior engineer at QMarkets, you will be responsible for developing and maintaining our products. You will be working on a range of technologies building our next gen product, while improving constantly the code and the architecture.

This position is perfect for engineers who wants to have a real impact on technology, code and product wise, with growth and scale in mind. The position includes the development of many new complex components & modules, integration with existing libraries and platforms, performance and planning for a system that is used by extremely large companies.

As Senior Engineer you'll be responsible for

-) Demonstrate constant high standard value, in coding, architecture and team's assist while thinking on scale and best practices.
-) You will participate in the full product lifecycle: planning, documenting, development, testing and handling production aspects.
-) You will proactively suggest improvements across the whole stack.
-) Maintain our web application tech stack: PHP Drupal, Vue.js, MySQL, Redis, Docker, AWS and whatever else is required to get the job done.
-) Participate in recruiting, mentoring and contribute actively to our Engineering guild.

What we are looking for:

-) Above 7 years of software development experience.
-) 3-4 years developing in php.
-) Highly experienced in the full stack technologies and techniques.
-) Highly experience in planning large projects.
-) Experience in testing methodology & tools.
-) Proven track record of handling end to end projects technically, standing in time.
-) Excellent people and communicational skills
-) Capable of working in a multi-tasking and stressful environment
-) Fluent in English (both verbal and written).

Bonus points for:

-) Experience with VUE
-) Experience with Symfony Components
-) AWS experience.
-) Data visualization experience.
-) 3-5 years' experience in a SaaS company.

What we're offering

-) You will have the opportunity to accelerate our rapidly growing organization.
-) We're a lean team, so your impact will be felt immediately.
-) Agile working environment with flexible working hours and location.
-) Diverse, unique colleagues from every corner of the world.

If you're convinced you are the right fit and you can't wait to join our team, we look forward to hearing from you!
